AIR FILTER, SAFETY

Why Choose Donaldson Safety Filters?

Safety filters have two functions: to act as a backup to the primary filter and to protect the engine during primary filter servicing.

- Serve as a backup filter in case of primary filter damage or improper installation.
- Prevent contaminants from entering the clean side of the air intake system during primary filter servicing.
- Designed to plug rapidly if contamination finds its way past the primary filter, alerting operators about an issue.
- Recommend that safety filters are replaced with every third primary filter change unless there has been a failure of the primary filter.

Attributes

| | |
|---------------------|-----------------------|
| Outer Diameter | 75.8 mm (2.98 inch) |
| Inner Diameter | 58.5 mm (2.30 inch) |
| Length | 339.5 mm (13.37 inch) |
| Efficiency Test Std | ISO 5011 |
| Primary Application | AGCO 3901465M1 |
| Type | Safety |
| Style | Round |

Packaged Dimensions

| | |
|-----------------|-----------------|
| Packaged Length | 0.112776 M |
| Packaged Width | 0.112776 M |
| Packaged Height | 0.374904M |
| Packaged Weight | 0.272155422 KG |
| Packaged Volume | 0.0046637846 M3 |

Other Information

| | |
|-------------------|----------------|
| Country of Origin | Czech Republic |
| NMFC Code | 069100-05 |
| HTS Code | 8421310090 |
| UPC Code | 742330112595 |

The information contained herein is general in nature and may not reflect actual information regarding the part at time of shipment. Parts may originate in more than one country - the actual country of origin and HS Code will be reflected on the Commercial Invoice(s) that accompanies the goods.
