## **DIRECTIVE 2011/65/EU (RoHS)**

OSTP is a Specialist Welded Stainless Steel Tubular Products manufacturer offering one of the broadest ranges of all producers, including Process Pipes & Tubes, Butt Weld Fittings, and Process Equipment, for pressure corrosion applications.

Directive 2011/65/EU (Restriction of Hazardous Substances) and delegated Directive 2015/863 (RoHS 3) restricts the use of certain hazardous substances in electrical and electronic equipment. It establishes the following permissible maximum concentrations for hazardous substances in homogeneous materials:

- max. 0.1 % by weight for lead, mercury, hexavalent chromium, polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE), and a range of phthalates (DEHP, BBP, DBP, DIBP)
- max. 0.01 % by weight for cadmium.

OSTP is a downstream user of the substances included in the stainless steel and requires its suppliers to have the necessary registrations in place for the materials purchased.

In summary, the products of OSTP manufacture fully comply with RoHS requirements and there are no substances to be declared.

**Best Regards**
