Betr./Re.: **REACH Statement zur EC 1907/2006**

I am writing to you in relation with REACH, the Regulation of the European Union for Registration, Evaluation, Authorisation and Restriction of Chemicals that came into force on June 1 of 2007.

According to this new legislation, every manufacturer or importer of substances and preparations, in amounts equal to or over one tonne per year, must submit a registration dossier to the Agency.

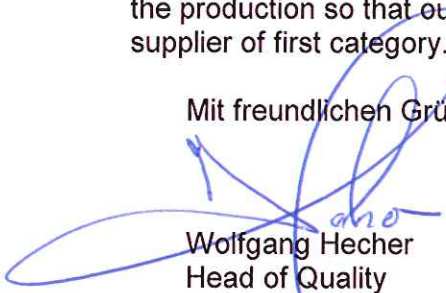

For sure, you will know that in case that manufacturers and importers do not pre-register their substances between June and December 2008, they won't be able to make use of the envisaged registration deadline, so if that procedure is not carried out, the marketing and use of the substance will become illegal.

On conformity with the application of the REACH Regulation, as suppliers of stainless steel tubes to your company, these are considered ARTICLES, as defined in article 3 of the regulation and therefore exempted from registration and pre-registration under REACH. In the same way we inform you that the above mentioned articles do not contain any substance included on the Candidates List for Authorization.

Regarding to the substances that we buy in the EU we have assured ourselves that the relevant pre-registrations have been made in the legally established period. And regarding to those substances that we buy out of the EU, as importer, our company has also made the relevant pre-registrations.

Therefore, SBER can totally ensure the supply of the raw materials for the continuity of the production so that our clients can trust in the continuity of our company as preferential supplier of first category.

Mit freundlichen Grüßen / Best regards

Wolfgang Hecher
